USE WIDGETS to embed RCSB PDB features on your website

**WIDGETS** are small bits of code that add RCSB PDB features and functionality to any web page.

*Molecule of the Month* images and text, static images and interactive views for any PDB structure, and RCSB PDB searches based on PDB ID, author name, and keyword can be easily embedded into any website.

For more information and additional widgets, see the *Widgets* page linked from the *Tools* section of the RCSB PDB’s left menu or http://www.rcsb.org/pdb/static.do?p=widgets/widgetShowcase.jsp

<table>
<thead>
<tr>
<th>RCSB PDB Molecule of the Month Widget</th>
<th>Tag Library Widget</th>
<th>Image Library Widget</th>
</tr>
</thead>
<tbody>
<tr>
<td>This widget embeds an image from the <em>Molecule of the Month</em> for a particular protein and links to the entire article. The widget can be customized to specify width, colors, amount of text, and molecule shown. It can also be set to automatically update when new <em>Molecule of the Month</em> features are released.</td>
<td>The Tag Library can be used to embed an image that links to the corresponding Structure Summary page; provide a menu of links to a particular entry's Jmol view, Structure Summary Page, and PDB file; and provide a link that performs a current keyword or author name query.</td>
<td>The Image Library widget embeds an image of a structure based on PDB ID. The image size and type of assembly (asymmetric or biological) can be customized. Using this widget means that the images don't have to be downloaded on your server, and links never have to be checked or updated - the library maintains this automatically.</td>
</tr>
<tr>
<td><img src="image1" alt="RCSB PDB Molecule of the Month" /></td>
<td><img src="image2" alt="Tag Library Widget" /></td>
<td><img src="image3" alt="Image Library Widget" /></td>
</tr>
</tbody>
</table>

**Widget Example**

Adding the text below to your HTML page will embed the large *Molecule of the Month* widget on your webpage.

```html
<div style="float:left;margin-right: 10px;">
<script type="text/javascript">
rcsb_mom_width = '250px';
rcsb_mom_headerColor = '#ff6600';
rcsb_mom_bodyColor = '#ffffcc';
rcsb_mom_type = 'full';
</script>
<script type="text/javascript"
src="http://www.rcsb.org/pdb/widgets/rcsbPdbMotm.js">
</script>
</div>
```
