85.8% (309/360) of all residues were in favored (98%) regions.
99.4% (358/360) of all residues were in allowed (>99.8%) regions.

There were 2 outliers (phi, psi):
[3] 11 SER (-164.4, -27.7)
[7] 23 ASN (-162.5, 4.6)
86.1% (31/36) of all residues were in favored (98%) regions.
100.0% (36/36) of all residues were in allowed (>99.8%) regions.

There were no outliers.
